VIA Rail Canada

# It's Time to Reimagine the Way Canadians and Tourists Travel

The Fleet Replacement Program is a building block of VIA Rail modernization plan which will help contribute to building a more connected Canada. Starting in 2022, VIA Rail began deployment of a new generation of trains on the Quebec City-Windsor corridor that will transform the travel experience for Canadians and tourists. A more comfortable, sustainable, and accessible service, improving the environmental footprint through advanced energy-efficient technology. Get ready to experience this new adventure with us!

### Fun facts

- 30 years: Estimated Life Span
- 200 000 miles: Estimated number of km to be covered annually: 200 000 miles/year (320 000 km/year) or 8 times around the world
- 0.01 grams: The smallest piece electronic components (microchips, LEDs for screens) Weight: less than 0.01 grams or 100 times lighter than a paper clip
- 1,375 miles: Autonomy in miles/km: 1,375 miles or 2,113 km, or a little more than the distance between Toronto and Miami
- We serve over 4.7 million passengers a year in our Quebec-City-Windsor corridor
