## **Thermal Wellness Facility**

Fairmont Chateau Lake Louise is building on the resort's year-round health and wellness experience with a new state-of-the-art, eco-friendly Thermal Wellness Facility. Once completed, the facility will be located on the site of the hotel's previous outdoor pool, which was built in 1926 and closed in 1980. Our goal is to set a worldwide standard for guest experience as well as ensure low-impact design and construction.

The Thermal Wellness Facility will deliver a 31k square foot, world-class, destination bathing experience that capitalizes on the unrivalled and iconic views of Lake Louise. The facility concept includes a curated collection of indoor and outdoor thermal experiences, relaxation areas, food & beverage, as well as two specialty treatment rooms. In conjunction with resort activities and retreat programming, the facility will serve to enhance Fairmont Chateau Lake Louise's positioning as one of Canada's premier Wellness Destinations.

A CGI Animated Video Tour can be viewed here: <https://visitingmedia.com/tt8/?ttid=fairmont-chateau-lake-louise#/video/6/>

Construction is currently in progress, leading up to an anticipated opening date of late Spring 2025.
