Niagara Falls, Ontario*

## **Exciting changes are coming to the Niagara Parks Power Station + Tunnel in 2024!**

Work is currently underway to integrate the Currents show into a new overall nighttime experience that will include new lighting throughout the generator floor and the Tunnel. The new nighttime experience will allow more flexibility for guests without the requirement of booking a specific showtime as it will be available from 7:00 p.m. – 10:00 p.m. each evening. Niagara Parks will also be introducing a new multilingual audio tour, available in English, French, Spanish & German, that will be included as a value-add with regular daytime admission. New interactive exhibits are also part of the additions planned for May 2024!
