VICTORIA BUTTERFLY GARDENS BRANCHES INTO CHOCOLATE MAKING!

Victoria Butterfly Gardens is mostly known for its wide array of exotic butterflies, free flying birds and creatures such as a dwarf cayman, turtles, iguanas and more, all rescued, donated or adopted.

What is less known is that our tropical climate allows us to produce papaya, ginger, vanilla and other exotic fruits.

For the first time our cacao plants have given off pods full of beans which we used, in conjunction with a local chocolate maker, to produce mouth watering chocolates which were offered for sale in our gift shop. A full circle of production!
